About This Game

DiRT Rally out now for macOS and Linux

DiRT Rally is the most authentic and thrilling rally game ever made, road-tested over 80 million miles by the DiRT community. It perfectly captures that white knuckle feeling of racing on the edge as you hurtle along dangerous roads at breakneck speed, knowing that one crash could irreparably harm your stage time.

DiRT Rally also includes officially licensed World Rallycross content, allowing you to experience the breathless, high-speed thrills of some of the world's fastest off-road cars as you trade paint with other drivers at some of the series' best-loved circuits, in both singleplayer and high-intensity multiplayer races.

• ICONIC RALLY CARS - DiRT Rally boasts over 40 of the most iconic and relevant cars from yesteryear through to modern day, representing the cars that the players want, and the ones that make the most sense for the surfaces they race on.
• SIX MASSIVE RALLIES WITH OVER 70 STAGES - Head to the muddy paths of Wales, the dusty trails of Greece and the icy tarmac of Monte Carlo. Take on the legendary hillclimb of Pikes Peak, the snowy thrills of Sweden, and the epic scenery of Finland.
• OFFICIAL FIA WORLD RALLYCROSS CONTENT – Race at the Lydden Hill, Holjes and Hell tracks in six of the fastest off-road cars and take on your friends in high intensity, bumper-to-bumper multiplayer racing.
• CUSTOM RALLY EVENTS: Take any car on any track – configure and compete in single or multi-stage events.
• RALLY CHAMPIONSHIPS: Start on the bottom rung of the rally ladder and compete in a succession of events, earning points and money on your way to promotion. Use skilful driving and manage your repair schedules as you work your way to the

top division and earn the most lucrative rewards.
• UPGRADES, REPAIRS, SETUP AND TUNING - DiRT Rally delivers depth in areas beyond driving – elements such as repairs, upgrades, and setup & tuning add a rich and strategic dimension to your rally experience.
• CHALLENGING, UNCOMPROMISING HANDLING MODEL - Codemasters has completely rebuilt the physical simulation for DIRT Rally to adequately capture how it feels to race across changing surfaces and has created brand new models for differential, suspension, engine mapping and turbo modelling.
• TEAM MANAGEMENT - Hire and fire your crew members each of whom which will have different skills, improving repair times for different parts of the car. Teach them new skills as they gain experience and work together as a team to improve your performance in events.
• PLAYER LEAGUE SUPPORT - Get together with friends and run your very own racing league. Join or create unlimited leagues and run them how and when you want.
• DAILY, WEEKLY AND MONTHLY ONLINE CHALLENGES - It's you versus the entire DiRT community in a series of one-day, week-long and month-long challenges to earn in-game credits to improve your car and team.

FWD, frontal left tire is gone, but still running 160 km\/h on dirty road. Hits tree. Just a flesh wound, still running. No, thanks. This is one of the best experiences in a racing game, so long as you are looking for a game that feels real. This game will punish you for every little mistake, and is best played with as few assists as possible.. Not legit VR. You are basically watching a screen in your VR headset of the game you are playing. It is awful and should feel bad.. buy a wheel or controller to enjoy this game. Dirt rally is a game for experienced drivers so don't buy it if you are new to racing games but.... if you've played a lot of racing games
and your pretty good at it, well this game is really good and this is why

nice career with rally and rally cross and even hillclimb
the cars handling and speed feels good
many cars

so thats why I recommend Dirt rally!

i hate this game so much. Wu tu tu tut tu tut tu tuuuu
ihhhhhh....
Boom.. rip paul walker. Best heart attack simulator on the market. Inconsistent. This game is too hard for normal people to enjoy. Controlling the cars with anything other than a steering wheel and a pedals is a waste of time, and I would recommend that you stay away from this game unless you have those things.
